3. Unique value proposition

1. CUSTOMER SEGMENTS

- Target Customers: *Self-employed coffee shop owners (Autónomos) in Spain who manage high frequency daily transactions*
- Early Adopters: *Tech-forward specialty coffee shop owners in major cities (Madrid, Barcelona) who are concerned about the upcoming 2026 Verifactu enforcement deadline.*

3. Unique value proposition

2. PROBLEM

- Legal Risk: Small owners are overwhelmed by the complexity of Royal Decree 1007/2023 (Verifactu) and fear heavy fines for non compliance
- Cash Flow Blindness: Difficulty in calculating real-time net profit after subtracting 10% IVA, ingredients, and staff costs.
- Wastage Leakage: Significant financial loss from unrecorded perishable inventory (milk, pastries) that isn't factored into daily accounting
- Existing Alternatives: Manual spreadsheets or generic invoicing apps that lack specialized coffee shop inventory or automated hash chaining for Verifactu10.

3. Unique value proposition

3. UNIQUE VALUE PROPOSITION

- The Message: "The first 'Audit-Proof' CFO in your pocket automated Verifactu compliance and real-time cash flow specifically for Spanish florists and cafes."
- High-Level Concept: "A 'Blockchain-lite' POS that makes tax audits impossible and profit visible."

3. Unique value proposition

4. SOLUTION

- Automated Hashing Engine: A FastAPI backend that cryptographically chains every coffee sale, ensuring records are immutable and AEAT ready.
- Verifactu QR Generator: Instant generation of certified invoices with required QR codes and tax agency markers.
- The "Survival Clock": A dashboard that visualizes business runway and net profit by automatically deducting 10% IVA and operating costs in real time.
